

AAO Foundation Award Final Report

Principal Investigator	HeeSoo Oh D.D.S., M.S., PhD.
Co-Investigator	
Secondary Investigators	
Award Type	AAOF Orthodontic Faculty Development Fellowship Awards - Anthony A. Gianelly Teaching Fellowship Award
Project Title	
Project Year	2010
Institution	University of the Pacific, Arthur A. Dugoni School of Dentistry
Summary/Abstract (250 word maximum)	Support from the AAOF Orthodontic Faculty Development Fellowship Award has been of great assistance in preparing me for a lifetime career in academic orthodontics. It has helped me to dedicate most of my time to developing and expanding my knowledge and skills in clinical research and teaching. As the result, I was awarded the promotion to Associate Professor with tenure this year.
Were the original, specific aims of the proposal realized?	Yes. I am continuing to develop my professional career in teaching and clinical orthodontic research.
Were the results published? If not, are there plans to publish? If not, why not?	I am currently preparing the first two papers in the series of mixed dentition study investigating the usual course and outcome of mixed dentition treatment when three experienced clinicians treat each patient with his or her preferred therapeutic modality for each patient. This project is designed as a retrospective randomized observational study.
Have the results of this proposal been presented? If so, when and where? If not, are there plans to do so? If not, why not?	I presented 'Growth Changes in Early Treatment: A Cephalometric Evaluation' in Northern California Angle Society meeting in April 2011. I will be presenting 'Reconsidering of the Effectiveness of Orthodontic Treatment' in the Angle Society 2011 Biennial meeting in September 2011
