

AAO Foundation Award Final Report

Principal Investigator	Chin-Yu Lin
Co-Investigator	
Secondary Investigators	
Award Type	AAOF Orthodontic Faculty Development Fellowship Awards
Project Title	T.M. Graber Teaching Fellowship Award
Project Year	2005
Institution	Harvard School of Dental Medicine
Summary/Abstract	<p>With the support of AAOF Orthodontic Faculty Development Fellowship Award, I have achieved proposed goals in my academic development as a full-time orthodontic faculty at Harvard School of Dental Education. In the funding year, I was the Pre-doctoral Director of Orthodontics and the co-director of pre-doctoral instructional block, "Treatment of the Child and Adolescent". I engaged in the activities of planning curriculum, lecturing, and supervising pre-doctoral orthodontic clinic. I also supervised and participated in various research projects by dental students, graduate students, and PhD students. In research, I received an invitation for an oral presentation with the topic of "Dental follicles inhibit osteoclast differentiation" at the annual AADR meeting at Orlando in March of 2006. My research results of SH3BP2 mutation of cherubism is being reviewed by a prestigious journal. In clinic, I treated orthodontic patients at the Faculty Group Practice. Being active in academia, I pursue my career in orthodontics and continue to contribute my abilities to the progress of orthodontics.</p>
