AAO Foundation Award Final Report

Calogero Dolce

Principal Investigator

Co-Investigator  Secondary Investigators  Award Type  Teaching Enhancement Award  Project Title  Teaching Enhancement Award  Project Year  1999  Institution  University of Florida  Summary/Abstract  I have continued to teach our orthodontic residents in both the clinic and in seminars. In addition, I was course director for two undergraduates' orthodontic courses. One of the courses I developed as a web based course so that student could supplement their class notes. In addition, I developed a web based competency exam for senior dental student (http://www.medinfo.ufl.edu/dental/dolce/).  This was well received by the students as well as the administration.  In fact, other departments have adopted web-based competency based on my model.

on my model.
In the area of research, I am continuing to collect and analyze
data on the "MULTISITE CLINICAL TRIAL OF RIGID VR WIRE
FIXATION" grant. One manuscript has been accepted in the
AJODO and another has been submitted to the J. Oral Maxillofac
Surg. Two other manuscripts are in preparation. With respect to
basic science, I have three students who are conducting research in
the biology of orthodontic tooth movement. One student was
selected to present his research at the ADA meeting in Hawaii. In
February of 1999, I submitted a grant to NIH. However it did not
receive a fundable score, consequently I will be submitting an RO3 in
December 1999. This grant will be able me to collect more
preliminary data so that I can resubmit the NIH grant.

In the area of service, I am serving in a committee to examine
the undergraduate clinical curriculum. In addition, I am the chair for
the search committee for the vacant position which, we have in our
department.
